MIGNON DAHLIAS

Traveling in Europe last summer, Mr. P. Weller was surprised at the popularity of this variety or class of Dahlias over there. Everywhere he observed most gorgeous and striking beds of these beautiful flowers, in parks and private gardens, along boulevards and driveways, and he made up his mind that if anything should be introduced in America it be the MIGNON DAHLIA.

These are unsurpassed for bedding plants where quantities of flowers are required during the summer months. These single-flowered Dahlias attain a height of about 18 inches and begin to flower early in June and continue to do so until frost. The flowers are about 2-3 inches across and the colors are most striking, from pure white to golden yellow and orange and from light pink to deep carmine red and purple. They should be set about 18 inches apart in beds in June, either in the border or solid beds.

Where one desires a great deal of color, we strongly recommend the Mignon Dahlia.
